

# miniSMDC Series

## PolySwitch® Resettable PPTCs

### Description

The miniSMDC series provides surface mount overcurrent protection for applications where space is at a premium and resettable protection is desired.

### Features

- Broadest range of resettable devices available in industry
- Low resistance
- Small 1812 footprint
- Fast time-to-trip
- RoHS complaint, lead-free and halogen-free
- Recognized to UL 1434
- Conforms to IEC 60730-1, Clauses 12, 15, 16, 17, J15 and J17

### Additional Information

Resources

Accessories

Samples

### Applications

- Mobile Electronics
- Mobile Batteries
- Computer
- Portable electronics
- Multimedia
- Game machines
- Telephone and broadband
- Automotive
- Industrial controls
- Battery

### Additional Information

| Agency | Agency File Number |
|--------|--------------------|
|        | E74889             |
|        | 78165              |
|        | 72161779, 50276261 |

# miniSMDC Series

#### Notes:

$I_H$  : Hold current: maximum current device will pass without interruption in 20°C still air.  
 $I_T$  : Trip current: minimum current that will switch the device from low resistance to high resistance in 20°C still air.  
 $V_{MAX}$  : Maximum continuous voltage device can withstand without damage at rated current.

$I_{MAX}$  : Maximum fault current device can withstand without damage at rated voltage.  
 $P_D$  : Power dissipated from device when in the tripped state in 20°C still air.  
 $R_{MIN}$  : Minimum resistance of device as supplied at 20°C unless otherwise specified.  
 $R_{1MAX}$  : Maximum resistance measured one hour post-trip or post-reflow at 20°C.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|                             | Min                                | Max             | Min | Max | Min | Max | Min | Max | Min | Max |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

## PolySwitch® Resettable PPTCs

### Solder Reflow Recommendations

| Profile Feature                                | Pb-Free Assembly |
|------------------------------------------------|------------------|
| Average ramp up rate ( $T_{s\_MAX}$ to $T_p$ ) | 3°C/s max        |
| Preheat                                        | -                |
| • Temperature min ( $T_{s\_MIN}$ )             | 150°C            |
| • Temperature max ( $T_{s\_MAX}$ )             | 200°C            |
| • Time ( $t_{s\_MIN}$ to $t_{s\_MAX}$ )        | 60-120 s         |
| Time maintained above:                         | -                |
| • Temperature ( $T_L$ )                        | 217°C            |
| • Time ( $t_L$ )                               | 60-150 s         |
| Peak/Classification temperature ( $T_p$ )      | 260°C            |
| Time within 5°C of actual peak temperature     | -                |
| Time ( $t_p$ )                                 | 30 s max         |
| Ramp down rate                                 | 3°C/s max        |
| Time 25°C to peak temperature                  | 8 min max        |

Note: All temperatures refer to top side of the package, measured on the package body surface.

#### Solder Reflow

- Recommended reflow method: IR, hot air, nitrogen.
- Recommended maximum paste thickness: 0.25mm (0.010in)
- Devices can be cleaned using standard methods and aqueous solvents.
- Experience has shown the optimum conditions for forming acceptable solder fillets occur when a reasonable amount of solder paste is placed underneath each device's termination. As such, we request that customers comply with our recommended solder pad layouts.
- Customer should validate that the solder paste amount and reflow recommendations meet its application.
- We request that customer board layouts refrain from placing raised features (e.g. vias, nomenclature, traces, etc.) underneath PolySwitch devices. It is possible that raised features could negatively impact solderability performance of our devices.

#### Rework

- Standard industry practices. (Please also avoid direct contact to the device.)

# miniSMDC Series

## PolySwitch® Resettable PPTCs

### Tape and Reel Diagrams

#### Warning

- Users should independently evaluate the suitability of and test each product selected for their own application.
- Operation beyond the maximum ratings or improper use may result in device damage and possible electrical arcing and flame.
- These devices are intended for protection against damage caused by occasional overcurrent or overtemperature fault conditions and should not be used when repeated fault conditions or prolonged trip events are anticipated.
- Contamination of the PPTC material with certain silicone-based oils or some aggressive solvents can adversely impact the performance of the devices.
- Device performance can be impacted negatively if devices are handled in a manner inconsistent with recommended electronic, thermal, and mechanical procedures for electronic components.
- PPTC devices are not recommended for installation in applications where the device is constrained such that its PTC properties are inhibited, for example in rigid potting materials or in rigid housings, which lack adequate clearance to accommodate device expansion.
- Operation in circuits with a large inductance can generate a circuit voltage ( $L di/dt$ ) above the rated voltage of the device.
