# **Description**

The 438A series AEC-Q200 Qualified fuses are specifically tested to cater secondary circuit protection needs of compact auto electronics application.

The general design ensures excellent temperature stability and performance reliability.

The high I²t values which is typical in the Littelfuse ceramic fuse family ensure high inrush current withstand capability.

# **Features & Benefits**

- Operating Temperature from -55°C to +150°C
- 100% Lead-free, RoHS compliant and Halogen-free
- Suitable for both leaded and lead-free reflow/wave soldering
- Recognized to UL/CSA/NMX 248-1 and UL/CSA/NMX 248-14
- Conforms to EN 60127-1 and EN 60127-7
- CE Mark indicates suitability for the European Market
- UKCA Mark indicates suitability for the UK Market
- AEC-Q200 Qualified

# **Applications**

- Li-ion Battery
- LED Head-Lights
- Automotive Navigation System
- TFT Display
- Battery Management System (BMS)
- Clusters

#### Notes

- 1. AC Interrupting Rating tested at rated voltage with unity power factor. DC Interrupting Rating tested at rated voltage with time constant < 0.8 msec.</p>
- 2. Nominal Resistance measured with < 10% rated current.
- 3. Nominal Melting I<sup>2</sup>t measured at 1 msec. opening time.

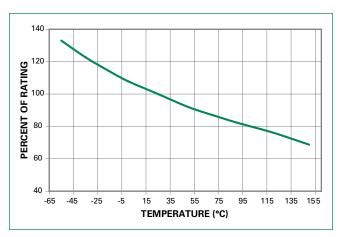

4. Nominal Voltage Drop measured at rated current after temperature has stabilized.

Devices designed to carry rated current for 4 hours minimum. It is recommended that devices be operated continuously at no more than 80% rated current. See "Temperature Re-rating Curve" for additional re-rating information.

Devices designed to be mounted with marking code facing up.

# **Temperature Re-rating Curve**

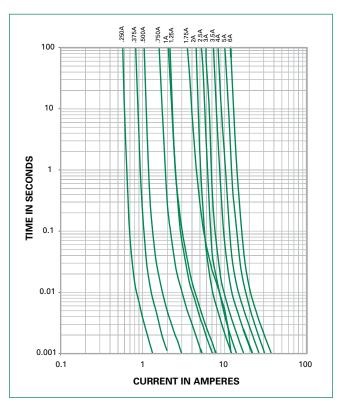

#### Note:

 $\textbf{1.} \ \ \text{Re-rating depicted in this curve is in addition to the standard re-rating of 20\% for continuous operation.}$ 

#### Example

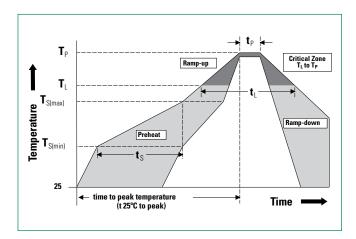

For continuous operation at 75 degrees celsius, the fuse should be rerated as follows: I =  $(0.80)(0.85)I_n = (0.68)I_n$
