EPC SERIES

CONFIGURABLE INTERNALLY BUSSED SEALED POWER DISTRIBUTION MODULE

Description

The EPC Internally Bussed Sealed Power Distribution Module (PDM) is a configurable, connectorized automotive power distribution box for main electrical system power distribution and protection in commercial vehicles.

This power distribution module has a dense concentration of high-power circuits and accepts plug-in devices, including automotive fuses, circuit breakers, diodes, and relays to protect and control complex electrical systems.

An internally mounted Printed Circuit Board (PCB) allows bussed connections to a large number of devices.

The EPC power distribution module can be built specifically to your design requirements as a special order product. Please talk to your local representative for additional details.

Specifications

Max Voltage Rating Continuous:12 / 24 VDCMax Voltage Rating32 VDCMax Total Continuous Current:160A

Operating Temp Range: $-40\text{C to} + 85^{\circ}\text{C}$ **Ingress Protection:** IP67 / IP69K

Mounting Method: Surface / Chassis Mount

Mounting Hole: 4X 6.5x9mm

Relay Compatible Type: Form C 280 and Form A 280

Applications

- Heavy Trucks
- Construction
- Agriculture
- Emergency Vehicles
- Material Handling

Features and Benefits

- Configurable PDM accommodates plug-in devices, such as fuses, circuit breakers, diodes, and ISO 280 relays (sold separately)
- IP67/IP69K-rated sealed enclosure protects internal circuitry from harsh environmental conditions, including shock, vibration, dust, and water
- Electrical connectors support surface mount applications
- Two separate power input buses
- Tether connects the cover to the base to prevent misplacement
- Lid features five spare fuse locations
