Subject: Industrial Business Unit Fuse Date Code Format

The electrical division of Littelfuse has established a date code to identify when a fuse was manufactured. Following is an explanation of this date code:

02 = First 2 digits is the month of the year
22 = Second 2 digits is date of the month
20 = Last 2 digits is the year

The date code above would translate to February 22nd, 2020.

Should you have any questions or need further assistance, please contact the Littelfuse POWR-Gard Techline at 800-832-3873 or via email at Techline@littelfuse.com.
