

ENGINE CUT-OFF SWITCH

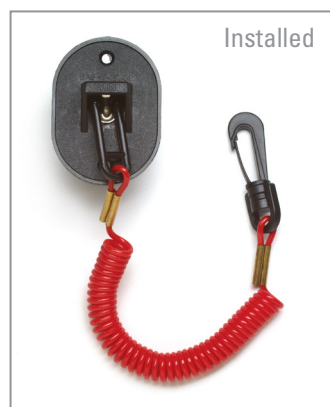

Comply with ABYC and USCG Requirements

DID YOU KNOW?

According to 46 U.S. Code section 4312, a manufacturer, distributor, or dealer that installs propulsion machinery and associated starting controls on a recreational vessel under 26ft in length **shall equip such vessel with an engine cut-off switch and lanyard** that meet American Boat and Yacht Council Standard A-33.

M-597-BP

Marine Cut-Off Switch and Lanyard shuts off the engine if the operator falls overboard preventing a runaway boat situation.

- IP66 weather-resistant conforms with SAE J1455
- Coil cord extends to 4'3" (1.3 Meters)
- Additional lanyards available by ordering part number M-598-BP
