Black ABS 94HB

## **Description**

The Informer-MS is a hand-held diagnostic tool designed for use with the Littelfuse 455\*.

The Informer-MS uses an infrared receiver to read valuable information transmitted from the 455\*, which can be helpful for troubleshooting the system. A green communication status light indicates the Informer-MS is receiving data from the 455. If communication is lost, the Informer-MS will display the last values it received.

#### **Features**

The Informer-MS displays:

- Real-time, line and load side voltage
- Real-time, line and load side voltage unbalance
- Motor run hours
- Last 20 faults
- Last 32 motor starts
- High and low voltage trip points
- Voltage unbalance trip point
- Restart and trip delay settings
- Voltage at last fault
- Communication status LED
- Auto shut off
- Last fault with trip conditions

### **Accessories**

#### Informer IR Kit-36

36" infrared adapter cable attaches to the face of the model 455 to provide remote diagnostics without opening the panel.

An infrared adapter (IR Kit-36) can be purchased to allow communication with the Model 455 without opening the panel door.

<sup>\*</sup>Model 455s manufactured after 03/01/06 are equipped with the infrared LED transmitter. Models manufactured prior to this date are not compatible with the Informer-MS.
