

MAXI Series

Blade Fuses – Rated 58V

Description

MAXI® 58 V Slo-Blo® fuses can protect circuits in automotive electrical systems up to 42 V. The blade fuses employ diffusion pill technology to provide predictable time-delay performance and low heat dissipation.

Features & Benefits

- See-through housing makes it easy to check whether a fuse has blown
- Checkpoints on top make it possible to measure resistance without removing the fuse
- Color coding shows the amperage rating for each fuse
- Comply with ISO 8820-3:2002
- Silver plating allows up to 150°C at the terminal interface
- High-contrast amperage stamp on the top of the housing aids identification
- Housing design prevents from mounting MAXI 32V fuses
- Simple to install and remove
