

MIDI High Performance Series

Bolt-down Fuses – Rated 70V-SF36

Description

MIDI® High Performance 70V automotive fuses protect circuits that receive large inrushes of current, such as those for fans, heaters, batteries, and starters. Silicon inserts ensure these fuses offer more than 1 Mohm of resistance in their open state. Like all bolt-down MIDI fuses, these employ diffusion pill technology to offer predictable time-delayed performance.

Features & Benefits

- 1 Mohm open state resistance
- High-contrast color coding on housing aids identification
- High tightening torque resistance
- Available with two, one, or no mounting holes
- Recognized as UL 248-1 Special Purpose Fuses (at 70V DC File E71611) and Directive 2011/65/EU
- Refers to ISO 20934 – Type SF36

Applications

- Cars / SUVs
- Trucks
- Offroad vehicles
- Power Tools
- 2/3 wheelers
- Buses
- Watercraft as approved by Littelfuse®
